ADMINISTRATION

By law the user must take due care, obtaining expert advice if necessary, to avoid unnecessary pain and distress when using the product other than as directed on the label.

SHAKE WELL BEFORE USE.

Do not use in lambs under 20kg or under 4 weeks of age. Do not use in calves under 100kg. Do not use with milk or milk-feeders, or while calves are suckling. A representative sample of animals should be weighed before treatment. Dose rate to be based on the heaviest animal in each group. Do not underdose. Where there is a large variation in size within the group, dose rate should be based on the label directions for each weight range. Drafting into two or more lines may be appropriate, to avoid excessive overdosing.

Regularly check the accuracy of the drench gun. Correct drenching technique should be used.

DOSE RATE: 1mL/10kg liveweight to give 0.2mg/kg Abamectin and 8.0mg/kg Levamisole HCL.
